

# Nijhuis Saur Industries acquires Flootech

**Nijhuis Saur Industries acquires Flootech to expand its leading position in industrial water solutions in Scandinavia and emerging industries like pulp & paper, power, bio-fuel and renewable energy.**

With the acquisition of Flootech, a leading provider of state-of-the-art water treatment technologies, process solutions and services for industrial and municipal clients in Finland, Nijhuis Saur Industries (NSI) is expanding its presence in Scandinavia to a.o. support the fast growing demand for blue-green infrastructure solutions in emerging industries like paper & pulp, power, bio-fuel and renewable energy around the world.

Mikko Siivonen, CEO of Flootech: “There is huge potential for resource efficient technologies, solutions and services in industrial water and wastewater treatment and we believe the acquisition by Nijhuis Saur Industries will accelerate the implementation of our growth strategy. My team is bringing new technologies and industrial competencies to the group and we are confident that together we will be able to better serve our industrial customers with an expanded and broader offering and service presence in both our home countries in Scandinavia and together with NSI in almost 140 countries around the world. Flootech will continue and intensify our customer- and competence-oriented collaboration, offering our valued customers innovative, cost-effective, sustainable and resilient solutions for the future.”

Menno M. Holterman, CEO and President of Nijhuis Saur Industries: “For over 50 years Flootech has successfully built a strong position and reputation in offering water treatment technologies, process solutions and services to over 1000 industrial and municipal clients. We look forward to working with Mikko Siivonen and the Flootech teams in Finland and Sweden and strengthen our group presence in the Nordic region as well as expand our presence in emerging industries like pulp & paper, power and renewable energy around the world. Through offering our unique portfolio of innovative technologies, game-changing solutions, added-value services including design, build, finance, operate and maintain (DBFOM) and rental and mobile water solutions, we aim to become our clients’ water partner for life.”

## **About Nijhuis Saur**

Industries Nijhuis Saur Industries provides robust and adaptive solutions for sustainable water use, energy and resource recovery with a strong focus on protecting water resources through our #missionwater. With our unique Customer for Life approach, we help industries, utilities, and cities to comply with 'reduce, reuse and recover'. By doing so we contribute to the climate transition, the circular economy and build a more resilient, sustainable, and inclusive future.

Nijhuis Saur Industries, together with Econvert, Unidro, Nortech, Riventa, Byosis, PWNT, Sodai and the recently announced acquisition of Aqua-Chem, provides integrated and turnkey customized water solutions. The Nijhuis Saur Industries multidisciplinary teams develop, design, manufacture and implement smart and breakthrough solutions based on our extensive product range and innovative and best available technologies (BAT), such as rental, mobile water treatment and financing solutions. Our goal is to help our customers reduce their environmental footprint, combine productivity and energy efficiency, improve quality, health and safety, while reducing life cycle costs.

Nijhuis Saur Industries operates worldwide and serves over 5000 references from its Regional Centers in the Netherlands, Germany, Finland, Sweden, United Kingdom, France, Spain, Portugal, Italy, Dubai, Saudi Arabia, Egypt, Poland, Singapore, United States & Latin America. Located in the Netherlands, Nijhuis Saur industries encompass all fast-growing Industrial Water Solutions from the Saur group.

## **About Flootech**

Flootech is a Finnish-based provider of high end technological solutions used in water and wastewater treatment. Flootech specialises in industrial and power plant resource-efficient water, wastewater treatment and water recycling solutions to allow its customers to produce high quality process water, minimize and decrease water, energy and chemical consumption as well as environmental impact.
